

Team number	94
University	Esslingen University of Applied Sciences
Offence	Violation of EV 5.8.4.
Reason	The team wasn't able to show, that the SDC is openend when the maximum cell temperature according to ESF is exceeded.
Decision	DQ for the Endurance according to IN 12.1.5.
Protest deadline	2026-07-15 18:00
Appeal	The team claimed, that the calculation of temperature derating used to determine which is the maximum allowed measured temperature was derived from the FS 2026 v1.1 rules. However, the FSCH handbook states that accumulators can also be compliant with the FS 2025 v1.1 EV 5.8 rules.
Protest decision	The officials follow the argumentation of the team. With the calculation following the FS 2025 v1.1 rules, the team was indeed able to show, that the SDC would open when the maximum cell temperature is exceeded. The penalty is repealed.
